TARIFF FORMAT

- A. Page Numbering** – Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** – Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Board. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Board is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** – When a tariff filing is made with the Board, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc., remain the same, just revised revision levels on some pages). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Board.

SECTION 4 – BASIC SERVICES AND RATES

4.1 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 4.1.1** Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded up to the next whole unit.
- 4.1.2** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 4.1.3** Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

4.2 Distance Calculations

The Company does not offer distance sensitive services.

4.3 Rate Periods for Time of Day Sensitive Services

The Company does not offer time of day sensitive services.

5.3.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.5 Custom Calling Features**

The features in this section are made available to Residential Customers on a per use basis. All features are provided subject to availability. Customers may utilize each feature by dialing the appropriate access code. The Customer will be billed the per feature activation charge shown in the table below each time a feature is used by the Customer. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all or some uses in some cases.

5.5.1 Feature Descriptions

Call Forwarding – A Customer activated feature that automatically transfers all incoming calls from the Customer's telephone number to another dialable telephone number until the Customer deactivates the feature. If forwarded to a long distance number the Subscriber will incur the long distance charges.

Call Forwarding Busy Line - This feature provides for calls terminating to a subscriber's busy directory number to be forwarded to another telephone number on a premises other than the provisioned premises. The customer selected forward-to telephone number is preprogrammed at the time service is established and can only be changed via service order.

Call Forwarding Don't Answer - This feature provides for calls terminating to a subscribers idle directory number to be forwarded, after a customer preselected interval, to another telephone number. The customer selected forward-to telephone number and specified interval are preprogrammed at the time service is established and can only be changed via service order.

Remote Access – Call Forwarding - This feature provides a customer the Call Forwarding feature and the capability to activate and deactivate the service remotely from any line/equipment capable of Touch-Tone signaling rather than only from the base station line. This feature does not require that a courtesy call be completed to the forward-to-telephone number.

Speed Calling – This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Caller ID - Allows a Customer to see a caller's telephone number previewed on a display screen before the call is answered. Caller ID requires the use of specialized CPE not provided by the Company

Caller ID with Name – Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered. Caller ID with Name requires the use of specialized CPE not provided by the Company.

SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.5 Custom Calling Features (Cont'd)****5.5.1 Feature Descriptions (Cont'd)**

Call Trace – Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only.

Call Blocking – Allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring.

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both calls.

Three Way Calling – Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference.

Call Return - Allows Customer to automatically dial the number of last incoming call, whether or not Customer answered phone.

Anonymous Call Rejection - Allows you to refuse calls from those who have blocked their numbers.

Repeat/Auto Dial – A feature that, when activated, automatically checks a busy number and when the line is free, rings the Customer back and completes the call.

Caller Identification Blocking: Allows the name and number of the calling party to be blocked from being transmitted when placing outbound calls.

Per Call Blocking: To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per call blocking, and it is provided on an unlimited basis.

Per Line Blocking: When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. There is no charge for per line blocking.

SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.5 Custom Calling Features (Cont'd)****5.5.1 Feature Descriptions (Cont'd)**

Remote Call Forwarding: Remote Call Forwarding (RCF) is an exchange service that utilizes a telephone number to forward automatically all incoming calls dialed to the RCF telephone number to another telephone number.

Distinctive Ringing: Distinctive Ringing provides a distinctive ringing pattern to the subscribing customer for up to six specific telephone numbers. The customer creates a screening list of up to six telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern (short, long, short). Calls from telephone numbers not included on the screening list will produce a normal ring.

Selective Call Forwarding: Selective Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of up to six numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list.

A Customer may obtain assistance, for a charge, in determining a telephone number by dialing Directory Assistance Service.

5.6.1 Basic Directory Assistance

The rates specified following apply when Customers request Company assistance in determining telephone numbers of Customers who are located within the State.

Requests for exemption must be accompanied by certification of the handicap. Acceptable certifications include those signed by a physician, issued by a state agency qualified to certify such handicaps or pre-existing certifications establishing visual or physical inability to use a directory such as those which qualify the handicapped person for an income tax exemption or social security benefits on the basis of blindness or physical disability or for use of the facilities of any agency for the blind.

5.8 Directory Listing Service

5.8.1 General

The following rates and regulations apply to standard listings in light face type in the white pages (alphabetical section) of the telephone directory and to the Directory Assistance records of the Company.

Directory listings are limited to such information as is essential to the identification of the listed party. The listing of a service, commodity, or trade name is not permitted unless it is the name, or an integral part of the name, under which the Customer does business.

A listing is limited to one line in the directory, except where in the judgment of the Company, more than one line is required to identify the Customer properly. In such cases, the additional lines required are provided at no extra charge.

Dual name listings are permitted as a regular directory listing for residential service.

Listing services are available with all classes of main telephone exchange service.

5.8.2 Listings

A. Primary Listing

One listing, termed the primary listing, is included with each exchange access line and each joint user.

SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.8 Directory Listing Service (Cont'd)****5.8.2 Listings (Cont'd)****B. Additional Listings**

Additional listings may be the listings of individual names of the Customer and members of the Customer's household, tenants of residential Customers who lease the Customer's premises for less than one year and do not occupy the premises at the same time as the Customer, members of a firm, officers of a corporation, employees of the Customer or other persons associated in business with the Customer, a business which the Customer owns and cross reference and alternate number listings.

Ordinarily, all additional listings are of the same address and telephone number as the primary listings, except as provided for joint user and alternate number listings.

Special Types of Additional Listings include:

Duplicate Listings – A listing of another name by which the customer is known, such as a nickname, abbreviated name, a name commonly spelled in more than one way, and a name consisting of several words which the public commonly rearranges. The listing may be complete or in a cross-reference form.

Alternate Telephone Numbers – A listing which refers calling parties to another telephone number at certain hours or on certain days or in case no answer is received on the call to the primary number.

SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)

5.8 Directory Listing Service (Cont'd)

5.8.2 Listings (Cont'd)

C. Nonpublished Service

The telephone numbers of nonpublished service are not listed in either the Company's alphabetical directory or Directory Assistance records available to the general public.

Incoming calls to nonpublished service will be completed by the Company only when the calling party places the call by number, and no exception will be made, nor will the Customer be called to determine whether he/she wishes to receive the call, even though it appears that the calling party desires the connection because of an emergency.

The Company is not responsible for any claims made or liability arising from failure to receive calls because of this arrangement.

The Subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a non-published service or the disclosing of said number to any person.

D. Nonlisted Service

Nonlisted service means the Customer's telephone number is not listed in the directory, but it does appear in the Company's Directory Assistance Records.

The Company is not responsible for any claims made or liability arising from failure to receive calls because of this arrangement.

The Subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a nonlisted service.

SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.13 Broadspeed PRI****5.13.1 Description**

Broadspeed PRI is a local exchange access service that provides direct digital connections via 1.544 facility between customers with ISDN-PRI compatible Customer Premises Equipment (CPE) and ISDN-PRI equipped switches.

Broadspeed Primary Rate Interface (PRI) provides local exchange access loop services such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), and business dial tone lines. It can also be used as loop transport for circuit data applications. Broadspeed PRI is provisioned on the 1.544 megabits per second (Mbps) bandwidth and uses ISDN architecture of 23 B or bearer channels and 1 D or data channel, or 24 B channels to provide the customer with the capabilities of a simultaneous access, transmission, and switching of voice, data and video applications via channelized transport.

Customers are given the opportunity to subscribe to the Company's services for 1 year, 2 year or 3 year terms. If the Customer discontinues its term commitment prior to the expiration of the agreed upon contract, the termination liability will be equal to the monthly charge multiplied by the number of months remaining on the contract. All Customers agree to meet and will be billed a minimum of \$150.00 in monthly calling volumes, including local service, intraLATA toll, interstate and international long distance calling for each Broadspeed PRI service.

SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.13 Broadspeed PRI (Cont'd)****5.13.2 Features**

- Calling Line Identification – Delivers the calling party's telephone number, if available, to the Broadspeed PRI subscriber. The number will be delivered if the call originates either in the same switch as the subscriber or is connected to the switch by SS7. This feature is available per port.
- Backup D Channel – provides a backup D channel as a standby spare in the event that the primary D channel fails. Multiple Facility Signaling Control is required for this feature. Backup D channel is available in the DMS switches; and must be NI-2 compatible.
- Caller ID With Name - This feature provides the originating telephone number and also the name associated with the line. The information is displayed on a Customer provided display device attached to the Customer's telephone line.
